PENNINGTON
THE GRASS SEED PEOPLE™

1STEP COMPLETE™

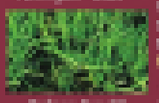
For Tall Fescue Areas

YOU'LL SOON SEE THE 1 STEP® COMPLETE™ SEEDING MIX DIFFERENCE!

Pennington 1 Step Complete® Seeding Mix system makes it easy to grow beautiful, thick, nutrient-soaking grass. Everything you need is pre-mixed and ready to use all in one bag. Simply apply, water and watch it grow. Our expert blend doesn't need any fillers and maximizes moisture around the seed while providing the essential nutrients needed to grow beautiful, thick grass.

Pennington® Grass[1]

Pennington 1 Step Complete® Seeding Mix system grows **80% THICKER WITH HALF THE WATER** than ordinary grass seed[2] during the germination period.



Ordinary Grass[1]

And because Pennington 1 Step Complete® Seeding Mix system contains our Pennington Sand Shield "seed", you'll continue saving water after the grass is established: **UP TO 30% LESS WATER** versus ordinary grass seed.

Smart Seed
SAVES UP TO 30% WATER

Pennington's Penkote® seed technology ensures better plant growth.

You Have Our Word

We're Pennington®. The grass seed people™. Cultivating your lawn for three generations by providing the finest grass seed you can buy.

[1] Assumes grass planting and care, including adequate sunlight, water and nutrient conditions. Individual results may vary.
[2] Based on 7 days after seeding. Drip irrigation applied at 0.25 inches per hour on ordinary soil with a root depth of 6 inches.

PLANTING SPECIFICATIONS

PLANTING RATE: 1 lbs. per 250 sq ft. (4 lbs in 1 lb. area)
PACKAGE COVERAGE UP TO: 250 sq ft. / 50 lbs. (12.5 lb. area)

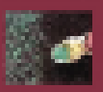
Planting Depth: ½"
Seedbed Temperature: 55 - 85°F
Light Requirement: Full sun to Partial Shade

Traffic Tolerance: Low
Drought Tolerance: Moderate
Recommended Mowing Height: 3-4"

Thick, Beautiful Grass - Guaranteed!

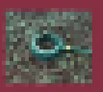
1. PREPARE

Remove debris, then rake the soil to loosen and smooth the top layer.



2. APPLY

Spread seeding mix to more than ½" thick everywhere lush, beautiful grass is desired.



3. WATER (Water Requirement: 2 days)

Keep the soil moist! Water daily (twice a day if you have no) until grass sprouts and reaches about 2-4" tall. Make sure darker green when it's properly watered. If it's light green, add more water.

ADDITIONAL CARE TIPS

- Once your grass is 1½" taller than the recommended mowing height you may begin mowing it.
- Avoid removing more than 1/3 of the total grass blade length at any single mowing to keep your grass thick and beautiful.
- Increase your mowing height for summer months to reduce grass stress.

IMPORTANT: Apply weed control products to grass prior to seeding can affect the seeds' ability to grow. Be sure to read and follow all manufacturer's recommendations and application instructions prior to applying any weed control products and prior to seeding. Additionally, do not apply any weed control products to newly seeded areas until grass is established and has been mowed at least 3 or 4 times. Once newly seeded areas are established, you can begin a regular feeding schedule.
